Slovak Republic
Kazumi Matsukawa – Kyoto Sangyo University, Japan, Yongdeog Kim – Hankuk University of Foreign Studies, South Korea, David Bridges – Great Britain, Seppo O.J. Saari – Finland, Carl C. Wolhuter – South Africa

The New Educational Review

The New Educational Review includes manuscripts in English that describe or synthesize both theoretical and empirical research in the sciences of education, sociology of education and psychology of teaching, and attempts to reflect on a variety of future trends in these fields. The articles may be of two types:

1. Contributors should submit manuscript to be considered for publication electronically as Word files with minimum formatting in Times New Roman by e-mail to ingrid.emmerova@umb.sk by authors from the Slovak Republic, to Petr.Franiok@osu.cz by authors from the Czech Republic and to stanislaw.juczzyk@us.edu.pl by authors from Poland and other countries.

2. The length of every manuscript is limited to 25 000 characters, including spaces, tables and figures. The following information should be provided on the first page: the title, the author's name and surname, full address of the institution, and an abstract of about 100 words. It should precede the text and include a brief statement of the problem, research method, data, and conclusions. In the case of a manuscript commenting on an article previously published on the journal, the abstract should state the topics covered and central thesis. Below the abstract, keywords should be written – cf. Guide for Authors on the website: www.educa
tionalrev.us.edu.pl.

3. If any of the findings reported in the manuscript have been published elsewhere, or if there are plans to use any or all of the findings in other manuscripts for publication, the author(s) should explain the intent and the circumstances at the time of first submission.

4. Reproductions of figures (graphs and charts) may be submitted for review purposes, but figures must be supplied in their original source files if the manuscript is accepted for publication – we do not accept scans of figures.

5. Avoid explanatory notes whenever possible by incorporating their content in the text. For essential notes, identify them by consecutive superscripts and list them in a section titled Notes at the end of the text.

6. Principles of citations in the text. The author's name, the year of publication and the page number in parentheses. References should be placed at the end of the article in alphabetical order. References written in languages other than English should be translated into English in brackets.

7. Guidelines for Contributors

The New Educational Review includes manuscripts in English that describe or synthesize both theoretical and empirical research in the sciences of education, sociology of education and psychology of teaching, and attempts to reflect on a variety of future trends in these fields. The articles may be of two types:

1. Manuscripts should be submitted in electronic form as Word files with minimum formatting in Times New Roman by e-mail to ingrid.emmerova@umb.sk by authors from the Slovak Republic, to Petr.Franiok@osu.cz by authors from the Czech Republic and to stanislaw.juczzyk@us.edu.pl by authors from Poland and other countries.

2. The length of every manuscript is limited to 25 000 characters, including spaces, tables and figures. The following information should be provided on the first page: the title, the author's name and surname, full address of the institution, and an abstract of about 100 words. It should precede the text and include a brief statement of the problem, research method, data, and conclusions. In the case of a manuscript commenting on an article previously published in the journal, the abstract should state the topics covered and central thesis. Below the abstract, keywords should be written – cf. Guide for Authors on the website: www.educa
tionalrev.us.edu.pl.

3. If any of the findings reported in the manuscript have been published elsewhere, or if there are plans to use any or all of the findings in other manuscripts for publication, the author(s) should explain the intent and the circumstances at the time of first submission.

4. Reproductions of figures (graphs and charts) may be submitted for review purposes, but figures must be supplied in their original source files if the manuscript is accepted for publication – we do not accept scans of figures.

5. Avoid explanatory notes whenever possible by incorporating their content in the text. For essential notes, identify them by consecutive superscripts and list them in a section titled Notes at the end of the text.

6. Principles of citations in the text. The author's name, the year of publication and the page number in parentheses. References should be placed at the end of the article in alphabetical order. References written in languages other than English should be translated into English in brackets.

7. All manuscripts are blind reviewed by two independent reviewers, who pay attention to the following as-

a) papers – formal presentations of significant research projects,
b) correspondence – general comments, brief descriptions of new results, letters to the Editor.

8. Because of a great number of manuscripts sent to the editorial office from the whole world, we publish only those which oblige the greatest number of points in the reviewer's form, placed on the website.

9. Together with the manuscript, every author should send the signed in and signed declaration and copyright form, which are placed on the website of the journal. Only the manuscripts which fulfill the formal as well as the essential requirements of our journal are referred to the editorial process.
